

Irrigation needle (Single use)

# iNP40-S

Needle for irrigation with negative pressure

## Needle that can reliably perform the iNP method developed by a specialist

Made in Japan  
Japanese register No. of PMDA  
11B1X0001800006

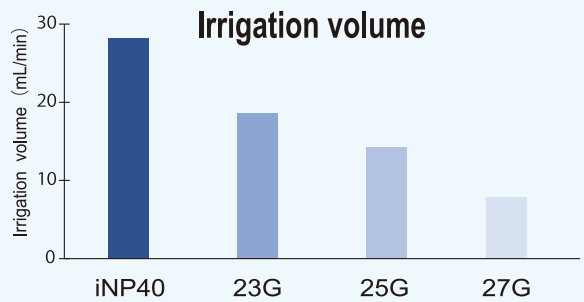

iNP40-S

### Feature 1

Designed for effective root canal irrigation

- Fine tip can handle narrower root canals
- Broad base makes for greater irrigation volume

Measurement results obtained by Dr. Japan

### Feature 2

Flexible and can be bent to various shapes

### Feature 3

Can be used effectively in the **iNP method**

## What is the **iNP method**?

	iNP Method	Conventional
	<p>irrigation solution</p> <p>iNP40</p>	<p>Vacuum</p> <p>irrigation solution</p>
Leakage		
Apical foramen		
Smear layer
